- Nickel-plated brass threads prevent corrosion in the socket
- Can be used safely in enclosed luminaires (may reduce service longevity)
- Dimmable to 5% with recommended dimmers
- 36 month warranty

MR16 Low-Voltage

MR16 (2 inch diameter) lamps produce a focused beam of light and are often used in retail displays, track lighting and landscape lighting. 12 volt MR lamps use a two-pin base with the pins spaced 5.3mm apart (GU5.3). These lamps require a transformer to operate.
